SUMMARY

Product Engineer and Full-Stack Engineer with 3+ years of experience building production web applications and SaaS products. Currently a Senior Full Stack Engineer at AIO, working on a restaurant website builder: editor features, publishing, custom domains, SEO and analytics. Previously built TradeRate, a social trading-signals platform, from scratch at K-Hive, and worked on AI-powered recruiting search at QLU.ai. Also designed and built two products end to end: Menu Board, a digital menu board SaaS, and PharmaFlow, a pharmacy ERP and POS, both using the Claude API. Works across React, Next.js and TypeScript on the frontend and Node.js, NestJS, PostgreSQL and MongoDB on the backend, and takes products from requirements to production, both with engineering teams and directly with founders.

EXPERIENCE

Senior Full Stack Engineer | AIO

Apr 2026 – Present

Islamabad, Pakistan | React, Next.js, TypeScript, NestJS, PostgreSQL, Nx

- Build and maintain features across the website builder: the editor restaurants use, the published websites their customers see, and the backend that connects the two.
- Shipped editor features including page and section duplication, template archive/restore/delete, hyperlink and button customisation, hero and Instagram carousel sections, and live menu and menu-board previews.
- Work on the publishing flow that turns an edited site into a live one, fixing production publishing failures and adding progress feedback and logging so issues can be traced.
- Handle custom-domain and DNS issues for published sites (Route 53), including wildcard-domain edge cases.
- Work on SEO and analytics for published sites: SEO title and settings, sitemaps, Google Search Console data and GA4 loading.
- Improve published-site quality: server-side rendering, image and video optimisation, removing redundant API calls, and accessibility landmark fixes.
- Ship through dev, UAT and production environments, fixing regressions found in squad testing and keeping SonarQube code-quality checks green.

Senior MERN Stack Developer | K-Hive (Kryptohive)

Sep 2025 – Apr 2026

Islamabad, Pakistan | React, TypeScript, Node.js, Express.js, MongoDB, WebSockets

- Built TradeRate from scratch as the senior developer, covering signal creation, a community signal feed, portfolio tracking and earnings across a React frontend and a Node.js/Express backend.
- Led development of a microservices architecture, worked on trade-engine performance and mentored junior developers.
- Worked with cross-functional teams to improve system reliability and ship new trading features aligned with business goals.

MERN Stack Developer | K-Hive (Kryptohive)

Jun 2025 – Sep 2025

- Designed and built a full-stack paper-trading platform that simulates real crypto trading using live market data from Binance WebSocket and REST APIs.
- Wrote the trade logic in Node.js/Express: market and limit orders, simulated slippage, P&L calculation and portfolio management.
- Built a responsive React/TypeScript dashboard with live charts, order depth, trade history and profit/loss snapshots.
- Stored users and trades in MongoDB to support history, backtesting and real-time analytics.

Full Stack Engineer | QLU.ai

May 2024 – Jun 2025

Islamabad, Pakistan | Next.js, React, TypeScript, Node.js, Express.js, PostgreSQL, Stripe

- Improved application performance by 30% through better resource loading, caching and removing redundant work.
- Worked with the AI team to bring over 30,000 executive profiles onto the platform, and improved search accuracy by 20%.
- Built and integrated REST APIs and managed the databases behind them.
- Built a Chrome extension that extracts LinkedIn profile details, plus LinkedIn invite and message flows that let users send personalised outreach from the platform.
- Integrated Stripe payments, including payment intents, checkout sessions and webhooks for real-time transaction updates.

Full Stack Developer | PreMed.pk

Nov 2023 – May 2024

Karachi, Pakistan | Next.js, Node.js, Express.js, Tailwind CSS

- Reduced page load time by 15% by refactoring code and optimising database queries.
- Built personalised student dashboards and the course vault page.
- Contributed to overall performance work that reduced server response times.

Frontend Developer | Interns Pakistan

Jun 2023 – Nov 2023

Faisalabad, Pakistan | HTML, CSS, JavaScript, PHP, WordPress

- Turned design mockups into responsive, interactive web interfaces with the design team.
- Worked with HTML, CSS, JavaScript, PHP and WordPress across several client web projects.

PROJECTS

Menu Board | Own product

2026

React, TypeScript, NestJS, PostgreSQL, Redis, MQTT, Kotlin (Android TV), Claude API, Playwright

- A multi-tenant SaaS for restaurant TV menus, designed and built end to end: a React dashboard and design studio, a NestJS API and worker on PostgreSQL, live updates over MQTT and a Kotlin Android TV app.

PharmaFlow | Own product

Jun 2026 – Oct 2026

TypeScript, React, Node.js, Express.js, PostgreSQL, Sequelize, Python (FastAPI), Claude API, Playwright, GitHub Actions

- A pharmacy retail platform built end to end: keyboard-first POS, batch-level inventory, purchasing, accounting, FBR digital invoicing and an AI service, across a Node.js API, React front-ends and a Python service.

SKILLS

Languages: TypeScript, JavaScript, SQL, HTML, CSS, C/C++

Frontend: React, Next.js, TypeScript, SCSS, Tailwind CSS, Kotlin (Android TV)

Backend: Node.js, Express.js, NestJS, REST APIs, WebSockets, MQTT (real-time), Python (FastAPI), Microservices

Databases: PostgreSQL, MongoDB, Redis, SQLite

Payments & Integrations: Stripe, Binance APIs, Google Search Console, Google Analytics 4, Chrome Extensions, Office.js

Cloud & DevOps: Git & GitHub, Docker, AWS Route 53, CI/CD (GitHub Actions), Playwright & Vitest, Monorepos (Nx, Turborepo), Caching

AI: Claude API, OpenAI API, Vision & document extraction, Prompt-to-structured-data, AI-powered product features

EDUCATION

Bachelor of Science in Computer Science | National University of Computer and Emerging Sciences (FAST-NUCES)

Aug 2019 – Dec 2023

Islamabad, Pakistan

CERTIFICATIONS

- Full Stack Web Development, Arfa Trainings, Lahore
